

ARCHANA DUBEY

SOFTWARE ENGINEER | BACKEND | TEST AUTOMATION
archooworship@gmail.com | [Github](#) | [LinkedIn](#) | (650)-338-9181

PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in Java and Spring Boot development, specializing in building scalable, high-performance backend services and microservices architectures. Experienced in designing and integrating RESTful APIs and distributed systems, ensuring system reliability, performance, and maintainability. Additionally skilled in developing automation frameworks using Playwright and TypeScript (POM-based) to support end-to-end validation and improve software quality and release efficiency.

TECHNOLOGIES

- **Programming Languages:** Java (Core and Advanced), JavaScript, TypeScript, SQL
- **Automation Tools:** Playwright, Gauge, Taiko, REST Assured, Postman, Junit
- **Frameworks:** Spring Boot, Hibernate, JPA, MVC Architecture, Microservices, Page Object Model (POM), Data-Driven Framework
- **CI/CD Tools:** Jenkins, Concord, Codefresh, Kubernetes, Docker
- **Version Control:** Git, Bitbucket
- **Databases:** MySQL, Oracle, PostgreSQL
- **Bug Tracking:** JIRA
- **Massaging & Steamline:** Kafka
- **Other Tools:** Splunk, Kibana, Apache Tomcat

PROFESSIONAL EXPERIENCE

Omnicell INC, Milpitas CA - Software Engineer
Level II 3.2025 – 2.2026

Part of the Point-of-Care product of Edge IoT integration connecting Omnicell that focus on the medication dispensing cabinets with enterprise healthcare systems to enable secure, real-time medication data flow and improve clinical workflows.

- Designed and optimized RESTful APIs using Java and Spring Boot, reducing response time by 80%
- Optimise microservices for real-time medication inventory management, ensuring data consistency across distributed systems
- Performed API testing, integration testing, and performance testing to validate system scalability and reliability

WALMART, Sunnyvale, CA - Software Engineer
Contract 1.2023– 4. 2023

A key contributor for the Ecommerce Team that mitigates, detects, and solves fraud across e-commerce web applications.

- Worked on CCM2 migration from CCM1, Created the Migration Plan, CleanUp unused config and wrote a Script for Validation in java. Converted.yml file to Properties file using Python to compare CCM1 and CCM2 config properties using Java.

- Worked on Pentest for services annual plan and Certs Update, Obsolete to keep certs up-to-date, participated in the Kafka Migration Process, and sent Splunk Alert to Slack and xMatters to get the critical Alert on time.
- Created a Dashboard for result response status of all request Type in kibana ,and worked in Concord to deploy and delete the list of flow to make the flow list shorter.

Java Developer (contract) 12.2020– 5. 2021

- Developed Common Entity classes from scratch for JPA components using JPA Repository, JEE Components, Spring, Hibernate to store the data in the database.
- Enhance speed of data retrieval from the MySQL database by developing web Application using CRUD operation.
- Implemented asynchronous API communication using Apache Kafka, improving system scalability and reducing response latency in microservices architecture.

INFOSYS, Palo Alto - Java Developer - 11.2021–11.2022

- Actively leveraging internal training tools to advance knowledge of (Python, JavaScript, Java/JEE) and integrating learned technologies in creating prototypes for future projects i.e. developed Spring Boot project to consume API from internally built Rest API to capture data in Json format.
- Developed a decoupled Service-to-Service communication layer between the "Career Portal" and "User Profile" microservices using Spring WebClient, enabling real-time validation of candidate documentation.

TECHNICAL PROJECTS

Online Pizza Ordering System

TECHSTACK: Java SpringBoot, MySql

- *Built end to end web application with order management system as a prototype from scratch that enables users to easily create personalized pizzas and allows business to easily process payment.*

Task Management System

TECHSTACK: Java SpringBoot, MySql, JSP

- *Built a full stack project to create and manage the task within the organization from the scratch. Users can create a task and assign tasks to themselves and others.*

EDUCATION

CODING DOJO - Full Stack Web Development Coding Bootcamp (2021)

INDIRA GANDHI NATIONAL OPEN UNIVERSITY - MS Computer Application (2016), BS Computer Applications (2010)
